DETAILED ACTION

Receipt of remarks dated 9-18-06 is acknowledged.

Claims 37 and 62 are canceled. Claims 33, 35-36, 42-43, 47-49, 54-61 and 63-64 are pending in the instant application. Claims 42 and 43 have been withdrawn.

Response to Arguments

In response to applicants arguments on pages 11-13 of the response and the Declaration filed By Dietmar Hueglin filed on 9-15-06, was found to be persuasive, and accordingly the rejection of claims under 35 USC 103(a) as being unpatentable over GB 2319523 has been withdrawn. A new rejection has been applied as follows:

Claim Rejections - 35 USC § 102

Claims 33, 35-36, 42-43, 47-49, 54-61 and 63-64 are rejected under 35 U.S.C. 102(e) as being anticipated any one of US 6,117,997 ('997) or US 6,284,821 ('821) or US 6,184,375 ('375).

The applied references 6,184,375 and 6,284,821 have a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the references, they constitute prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of

Art Unit: 1615

the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

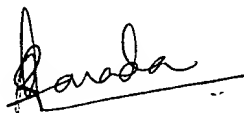

Each of the above patents describes triazine compounds having the same formula I, for stabilizing a number of organic materials against the damaging effect of light, oxygen and heat. The compound of Formula I in each of the above patents has the same structure and also reads on the instant phenolic antioxidants, where in the R₃ is radical 1g. Thus, the formula I of the above patents constitutes a species of the instant claimed genus of compounds and thus anticipates instant claims. See col.1 (entire), col. 7 of US '997 for the description of the phenolic compound and see col. 11-24 for the various types of polymers or organic materials that can be stabilized and the various compositions. In US '375, see entire col.1 and cols.13-28; and US '821, see col.1 and 13-36. The compositions stabilized by the phenolic compounds in the above patents include of the claimed household, body treating compositions and other personal care compositions that are listed in the instant claims.
